on the Basis of Value

The Morning Leader with the largest circulation—by many thousands—in Saskatchewan, offers you the best **Value.** It goes into more homes and exerts a greater influence upon its readers. Therefore advertisers find it pays to use **The Morning Leader,** and to use it continuously.

The Leader is the great "Want Ad. Medium" of the Middle West—the result-getter.

"The Regina Daily Post Forges Ahead"

The rapid increase in circulation during the past year demonstrates how rapidly The Daily Post is becoming Regina's most popular newspaper. This increased demand is due to its great popularity in the home, appealing as it does to every member of the family.

"THE POST GOES HOME"

Being an evening newspaper, if bought at a news stand or on the street, the purchaser takes The Post HOME so that he and his family may enjoy at their leisure the last-minute local and foreign news items which The Post contains.

Being an Evening Medium, and having the Largest Home Circulation in Regina, *THE POST* is naturally the accepted Advertising Medium of the City : : :

97% of our subscribers have paid in advance. Out of these 93% have paid for a period of three months and more.

Introductory

THE PUBLISHERS take pleasure in presenting herewith the Twelfth Edition of Henderson's Regina Directory, comprising the territory of the City proper and its Suburbs.

The Advertising Department presents the names of firms and individuals in Regina, who through their energy, loyalty and faith, are responsible largely for establishing the present very satisfactory local conditions.

The Miscellaneous Section in the front part of the volume contains up-to date and original statistics and data, much of which is not to be found elsewhere in print.

The value of the street section is often unappreciated by some who desire to find a certain house on a street unfamiliar to them to the extent it should be. By application of the following example the location of any street number can be found expeditiously: Suppose 2159 Smith Street is wanted: refer to street section Smith Street—glance down to 2159, then to the nearest intersection to 2159. It will be found that this number is on the east side of the street, five houses north of 14th Avenue, between 13th and 14th Avenues.

The Classified Directory contains a complete alphabetically arranged list of all articles manufactured and sold in Regina, which forms a most efficient wholesale and retail buyers' guide.

ADVERTISING REGINA

The Regina Directory is placed in the Directory and Public Libraries throughout the United States and Canada, where it serves the public as a valuable book of reference and the city it represents as a splendid standing advertisement, for no other publication can convey such an idea of the city, its business interests and all the various institutions and organizations. Few people realize what splendid publicity this affords the City and its industries.

1919 POPULATION OF REGINA, 38,520

These figures are an estimate only, based upon the number of names the Directory contains. It is not a census.

The Publishers desire to thank the general public for the courtesy and assistance extended to their representatives; especially the business and professional firms and individuals whose support by advertising in the directory, has made the publication possible.

City of Regina

Regina is situated in lat. 50.30, long. 105, 357 miles west of Winnipeg and 1,125 miles east of Vancouver, and is served by the three transcontinental lines, viz., the Canadian Pacific, the Canadian National and the Grand Trunk Pacific railways.

The selection of the townsite of Regina was arranged jointly by the Government and the C. P. R. Company. Early in 1883 an officer of the North West Mounted Police was sent to select a suitable place for the headquarters of the force, which had previously been at Winnipeg. On his return the lands at present occupied by the barracks were selected.

At this time an agreement had been completed between the Dominion Government and the railway company to enter into partnership regarding certain townsites, one of which was to be the seat of government for the Northwest Territories. Acting under this agreement, the general manager of the railway company, then W. C. Van Horne, and Mr. Dewdney, the Governor of the Territories, selected four sections, viz.: 19 and 30, township 17, range 19, and 24 and 25, township 24, range 20, west of the second meridian, to constitute the townsite of Regina.

Nominations for the first municipal elections took place on January 3, 1884. Two hundred and thirteen votes were polled, and the following were elected: J. W. Smith, J. A. Kerr, J. D. Sibbald, James Hambley, Daniel Mowat, W. H. Gibbs. Mr. D. L. Scott, now judge of the Supreme Court of Alberta, was the first mayor.

Regina was incorporated as a city on June 9, 1903, and is now the capital and seat of government of the Province of Saskatchewan.

The Parliament Buildings, the erection of which was commenced in the fall of 1908, stands in its own grounds of about 160 acres, south of Wascana Lake and within the city limits.

It has well been said that there are no parliament buildings more dignified or better adapted to the needs of legislative work than those of the Saskatchewan capital.

The building is constructed of Tyndall stone, fireproof throughout, at a cost to date of approximately $1,900,000, the erection being commenced in the fall of 1908, and the departmental offices occupied in the fall of 1910. The length of the building is about 543 feet, and the height of the dome approximately 187 feet. The central portion is 98 feet in width and 267 feet in depth, with a wing on either side, each 222 feet long and 72 feet in depth.

The City Council is composed of a Mayor and ten Aldermen. The Mayor is elected annually by a vote of the entire city, and commencing with the Municipal Election of December, 1914, the Aldermen have also been elected from the city at large. Prior to that time they were elected annually from the five wards of the city, two representatives to each ward. The bylaw making this change was ratified by the electors on the 10th of August, 1914, and provided

for the abolition of the ward system and for the reversion to the system of the election of aldermen by a general vote of the electors.

Regina is undoubtedly the financial centre of the province, and its development in this respect is very remarkable. Fourteen of the leading Canadian banks now have branches in the city, the majority of them having erected substantial and elaborate offices of their own.

The Bank Clearing House Association was established in 1909. The clearings for 1910 were $50,739,159; 1911, $73,032,088; 1912, $115,727,648; 1913, $132,087,457; 1914, $98,205,541.65; 1915, $87,122,611; 1916, $124,349,589; 1917, $169,800,113; 1918, $184,624,631.

A very large volume of business is transacted in the purchase and sale of bonds and debentures of the municipalities and school districts of Manitoba, Saskatchewan and Alberta.

Regina is justly entitled to be termed one of the best served railway cities in Western Canada. Twelve lines of railway radiate in all directions from the city, and the C.P.R., C.N.R. and G.T.P. vie with each other in their endeavor to give Regina an excellent train service.

The Great Northern Railway will have direct communication between Regina, Minneapolis, St. Paul and other southern cities over the G.T.P. Railroad Boundary Line. In addition to the lines in operation, bonds have been guaranteed by the Provincial Government for ten additional branch lines, which, when completed, will make a total of twenty-two railway lines radiating in all directions from Regina. A new union depot for the C.P.R. and C.N.R., thoroughly modern and up-to-date in every particular, has been erected and is now in use, but the C.N.R. has acquired considerable property in the east end of the city, and it would seem probable that this company will erect a passenger depot of its own in the near future.

The G.T.P. plans under way include the erection of a station, a magnificent hotel, power house, laundry, train sheds and underground tunnel, to cost in all approximately $2,000,000. The foundation and steel work for the hotel has been started. This investment, made by a company such as the G.T.P., speaks volumes for its faith in the city's future.

Owing to its geographical situation in the heart of the grain growing district of Western Canada, and with unequalled railway facilities, Regina is one of the largest distributing points for agricultural implements in the world, and practically every Canadian and American implement manufacturing firm of any importance has its agency in the city. The advantages for the distribution of other lines of goods are on a par with those for agricultural implements, and Regina has a large number of manufacturing concerns, some 114 wholesale and over 360 retail houses.

During 1915 the Robt. Simpson Western Limited acquired two blocks of land in the city's warehouse area, and erected a building costing some $300,000, which it proposes to extend to double its present capacity. It carries on a mercantile mail order business, and will conduct such other mercantile or manufacturing business as may subsequently appear expeditious. The company employed during the first year an average of 300 employees, and now employs some 930 hands.

The Imperial Oil Company, early in 1916, secured some 50 acres of land adjoining the city, whereon they have erected an oil refining plant which cost far in excess of $500,000. Further large expenditures in the plant in the near future are in contemplation. The company employs some 250 hands. Last year this company purchased a block of land and erected thereon some 30 attractive modern houses for its employees, and practically all of these houses are occupied.

During 1916 new warehouses were also constructed by the Prairie Biscuit Co., the Canada West Electric Limited, and the Canadian Consolidated Rubber Company. Warehouses were also secured by other concerns, chiefly the Macdonald Company, wholesale grocers; the Chevrolet Company, automobiles, and the Pat Burns Company, meat packers; the Auto Service Company, and the Producers' Commission Company, Limited.

In 1917 the T. Eaton Company, Limited, purchased from the city two blocks of land, on which they have erected a new mail order house which cost some $500,000. In the beginning the company proposes to handle the heavy lines of goods which it sells, and it employs some 70 hands. The company's plans provide for the addition of a retail store in front of the warehouse when business warrants.

Already this year properties have been purchased by the Robert Bell Engine & Thresher Company, Limited; McNall & Company, and the Winnipeg Ceiling & Roofing Company, Limited, each of which is erecting a new warehouse. Announcement has been made of the purchase of 40 acres by the Continental Oil Company for the purpose of constructing a refinery at a total cost of about a million dollars. The Regina Tire & Repair Company propose to erect a building on Hamilton Street on property recently purchased. The Coca-Cola Company is undertaking the construction of a factory. The International Harvester Company is arranging for a new large warehouse, and other warehouse construction is expected.

The city is a firm believer in municipal ownership, and owns its street railway, of which it has some 30 miles constructed within the city limits; light and water plant, supplying cheap light and power; and water system, the water being obtained from springs distant some eight miles. With regard to the two last mentioned utilities, the city has planned the expansion of the present systems, so that, when complete, they will provide for a population many times the number of the present one, supply sufficient power and provide adequate fire protection throughout the city.

In connection with cheap power, the city in 1914 entered into an agreement with Messrs. Coste & McAuley for the supply of natural gas. The city intends to arrange for the distribution of the gas within its limits, retaining full control of the utility, as it has done with its other utilities.

During 1914 the city extended its municipal ownership still further by the establishment of a Municipal Stock Yards on a scale sufficiently large to accommodate all the livestock raised in the province. The yards were opened in September, 1914, and considerable business has been carried on. The ultimate aim of the city, however, is the provision of an up-to-date stock yard to furnish a good market for all stock raised in the country tributary to the city.

Regina is also the headquarters of the Saskatchewan Co-operative Elevator Company and the Grain Growers' Grain Company, both of which have been of remarkable benefit to the farmers, and agriculture generally.

The city's public market, under the control of the Local Council of Women, contributes in no small measure to the welfare of the residents of Regina and to the people in the districts surrounding the city, in providing an open market for the sale and purchase of all kinds of supplies at first cost.

As a residential centre, Regina offers every inducement to the homeseeker. In this respect it has been referred to as "the City of Beautiful Homes."

From the educational and social points of view the city also offers every advantage. With a population of about 40,000, the city has the Regina College, St. Chad's College and the Provincial Government Normal School, all carried out in Gothic treatment, and a Collegiate Institute of classic design. A magnificent college is projected by the Presbyterians, their scheme including the purchase of some three or four hundred acres of ground on which to erect college buildings at a cost of about $1,000,000, making provision for the education of both sexes, also a hospital and other buildings in connection with same. The Roman Catholics have also expressed their intention of erecting a substantial college. From these points it will be seen that the city, although not fortunate enough to possess the Provincial University, may claim to be the educational centre of the province. In addition to the above, there are some 15 public and separate schools, 29 churches, Y.M.C.A. and Y.W.C.A.; two public hospitals and several private nursing homes; a public library with two branches; several business colleges and numerous societies for the advancement of art, music, literature and science, one daily morning paper, one daily evening paper, two weekly papers and several monthly trade publications.

Regina is one of the best paved cities in Canada for its size, having some 31 miles of paved streets, 75 miles of graded streets, 42 miles of granolithic and 72 miles of plank sidewalks. The city also has 69 miles of sewer with 6,237 connections; 73 miles of water mains with 515 hydrants and 3,948 house connections; 4 fire stations with some 36 firemen and a full equipment of the most modern fire fighting apparatus; some 257 acres of parks, a trunk sewer and sewage disposal works, and an incinerator plant for the disposal of garbage.

As to amusements, the city has a first-class theatre, and plans for the construction of another are under way. There are also some four moving picture theatres. The lake adjoining the Parliament Buildings offers facilities for boating, bathing and skating. Many fraternal societies and other organizations exist, devoted to amateur theatricals, cards, debates, etc. The city is within easy distance of Last Mountain and Katepwa Lakes, two of the beauty spots of the province and delightful holiday resorts, offering unequalled facilities for bathing, fishing and boating.

Regina's Municipal Buildings would do credit to a far larger city. The funds for their erection have been to a great extent provided by the sale of the townsite lands, yet the city still possesses an asset in its unsold warehouse property which is assessed at some $2,112,030.

Regina is also the headquarters of Military District No. 12, which comprises the Province of Saskatchewan. This adds much to the business and social life of the city.

Chief Constable—M. J. Bruton

STREET RAILWAY

The construction of the street railway as a municipal enterprise was projected in 1910. Actual construction began in the early part of 1911 and operation of cars on same was commenced July 29, 1911. At this time the system consisted of about six miles of track and six cars. At the present time there are about 30 miles of track within the city limits, 14¾ miles of this being in pavement. The rolling stock is as follows:

34 passenger cars

2 sweepers

1 snow plow

1 motor haulage car

30 freight cars

Total expenditure up to December 31, 1914, was $1,723,830, of which $266,065 was for cars and car equipment.

Operation statistics for the year ending December 31, 1918, are as follows:

Revenue passengers carried	4,926,676
Transfer passengers carried	564,944
Total passengers carried	5,491,620
Passenger car mileage	920,126
Other car mileage	14,109
Total car mileage	934,235
Passenger Revenue	$234,889.05
Other Revenue	13,748.71
Total Revenue	248,637.76
Operating Expenditure	218,459.09
Operating Surplus	$ 30,178.67

ELECTRIC LIGHT AND POWER PLANT

The electric light and power system is owned and operated by the city. This utility is not only self-sustaining, but revenue-producing.

The generating plant at old power house consists of four boilers, aggregating 1,000 H.P.

One 450 K.W. low pressure turbine generating unit.

Two 400 K.W. direct current railway units, vertical engine type.

One 1,200 K.W. motor converter, converting from 2,200 volt three-phase to 600 volt direct current.

A new power house has been completed in which the following additional apparatus is installed: Two 1,500 K.W. high pressure turbine generating units; one 3,000 K.W. high pressure generating unit; and six boilers, 3,000 H.P. capacity with Riley mechanical underfeed stokers.

Some 581 arc and 50 incandescent street lights are in use.

REFUSE DISPOSAL SYSTEM

Regina has now in operation one of the most modern Refuse Disposal Plants on the continent. All refuse collected from the city is hauled to a Central Transfer Station, where it is loaded into steel dump cars. From the Transfer Station, which was specially constructed for this purpose at a cost of $20,000, the refuse is transferred over the street railway to the incinerating plant at the Disposal Works, a distance of two and a half miles. The Incinerating Plant, recently constructed at a cost of $64,000, has a capacity of 110 tons per 24 hours and is modern in every particular. It is proposed to utilize the steam generated at the plant to drive the pumps at the Disposal Works and to light the grounds.

WATER WORKS SYSTEM

The water works system is owned and operated by the city. The supply of water is obtained from springs and artesian wells at Boggy Creek, about eight miles northeast of the city. A dam constructed across the Creek impounds about 100,000,000 gallons of water, which replenishes the Creek in times of drought. Forty-five wells have been sunk through clay to the water-bearing gravel bed found at an average depth of 100 feet. These wells overflow and yield pure sparkling water. Regina is in a unique position, as it is the only known instance of a large city deriving the bulk of its supply of water from overflowing artesian wells. A further number of wells will be sunk from time to time as requirements increase. The water is collected into the Barton Pump Well (270,000 gallons capacity), and raised into the Tor Hill reservoir by means of two 2,000,000 gallons per day turbine pumps driven by oil engines. Tor Hill Reservoir is a circular reinforced concrete construction, has a capacity of 5,000,000 gallons and stands about 125 feet above the city level; it is 202 feet in diameter and the maximum depth of water is 25 feet. The spring water is conveyed by 15-inch vitrified pipe to the compensating basin, and thence by 10-inch cast iron main to the city pumping station. The artesian well water gravitates from Tor Hill reservoir to the city through 18-inch main. An additional 25-inch main will be laid to supplement the foregoing.

A new rectangular reinforced concrete reservoir is situated near the city pumping station. It is 150 feet long, 153 feet wide, and holds 21 feet o f water, its capacity is 5,000,000 gallons.

The Compensating Basins have a capacity of 1,065,000 gallons.

There are installed at the city pumping station two 2 1-2 million gallons per day steam driven pumps, which can be operated in parallel or in series and furnish a pressure of 60 and 120 pounds per square inch respectively. There are also two steam driven horizontal direct acting pumps, and two 3 1-2 mill steam turbine driven pumps which can be operated in parallel or in series.

The normal domestic pressure by gravity is 40 pounds per square inch; it can be increased by pumping.

The distributing system consists of two trunk mains 24 inches in diameter, one one 18-inch, with a Venturi meter on each line, the gridiron connections range down to six inches.

PARKS

The area of land set aside for park purposes is about 257 acres and is valued with improvements at $3,300,000.

Wascana Park—Containing about 45 acres and situated to the south of the city, has a frontage of about a quarter of a mile along Wascana Lake, which extends for nearly two miles east, affording excellent facilities for boating, of which full advantage is taken. There is a large boat club building and a boat livery in the park. There is also a bathing house, which is open for the use of the public. A bandstand occupies an appropriate position in the park.

This park, adjoining as it does the ground of the Regina College, and having an outlook over the lake to the Parliament Buildings and grounds, offers excellent facilities for development as an ornamental park.

Victoria Park—Which contains over seven acres, situated in the centre of the city, is laid out as an ornamental garden.

Alexandra Park—Is used as a children's playground and is equipped with suitable gymnastic apparatus.

Stanley Park—During the season of 1915 was replanned and laid out in an appropriate form to suit the surroundings with new walks, flower beds, trees and shrubs. This park forms an appropriate frontage for the Union Depot of the Canadian Pacific and Candian Northern Railway Companies.

COLLEGE OF AGRICULTURE

The College of Agriculture is a part of the University and stands in the same relation to the University as does the College of Arts and Science. It has a number of buildings planned and equipped for carrying on its particular work and a staff of its own for the purpose of giving instruction especially in the technical subjects and elementary work in English, Mathematics and Sciences. Its laboratories and equipment are under certain limitations and restrictions, available to students in the other colleges of the University for the purpose of scientific research.

The aim of the College is to give the students under its care a good, practical training in the different technical subjects that bear upon the various phases of agriculture, such as animal husbandry, field husbandry, farm mechanics, farm engineering, dairying, horticulture, tree planting and others; to give them a good, liberal education in various other branches such as will enable them to adapt themselves readily, without great loss of time and energy, to new and varied conditions, and to fit them for their duties as good citizens.

EMMANUEL COLLEGE

In Affiliation with the University of Saskatchewan

The College is governed by a Board, composed of Ex-Officio and Elected Members of the Synod of the Diocese of Saskatchewan. Its appointment is regulated by Canon, and the elected members retire by rotation. They control all matters affecting the welfare of the College, and report their proceedings to the Synod annually. The Educational Committee is made up of the Faculty, together with the Bishop and two clerical members of the Board of Governors.

The College provides: (1) a pass course leading to the Testamur; (2) a course leading to the Licentiate in Theology, and (3) a course leading to the degree of Bachelor of Theology.
